

# CONNEXIONZ

## COMPANY OVERVIEW

### **Welcome to Connexionz UK**

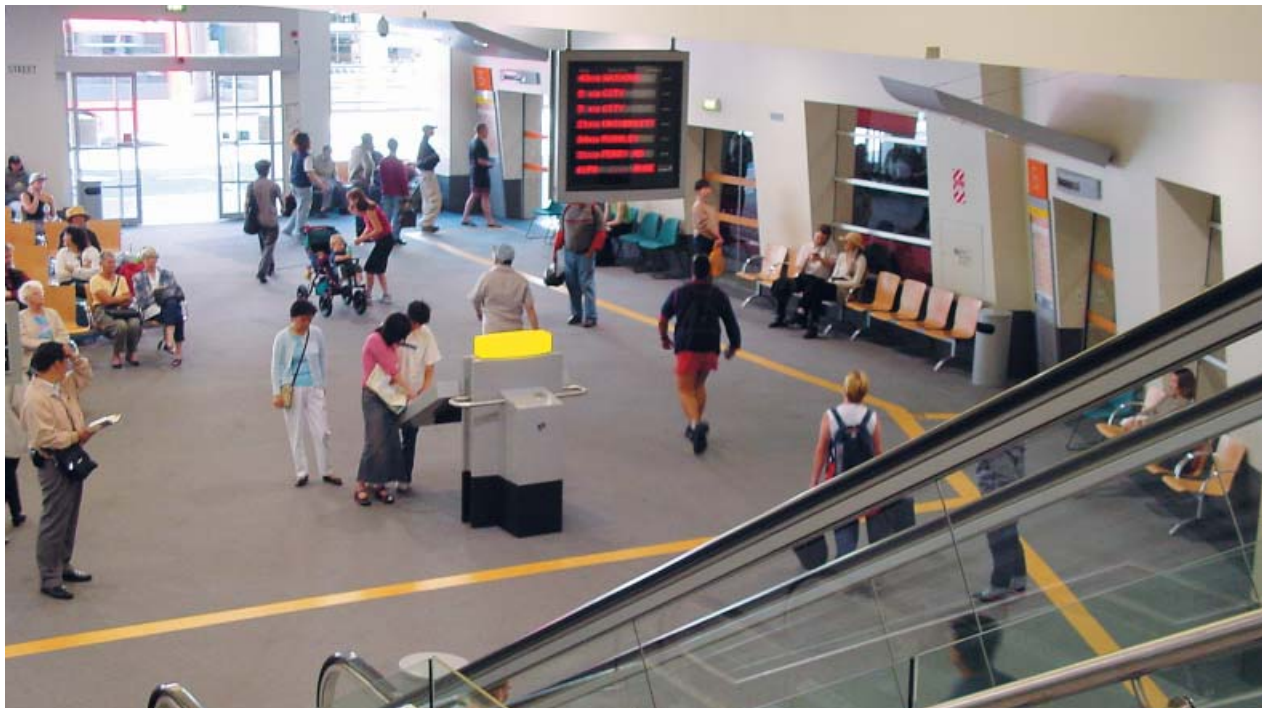

We provide comprehensive support services for local authorities and bus operators who use Real Time Passenger Information (RTPI) systems. With over nine years experience in this field, we can apply our knowledge of RTPI to any system and can help you to optimise your service quality and efficiency.

Currently, we oversee systems in the UK, China, USA, Brazil, Holland, Australia and New Zealand, all of which operate at a level where local authorities, operators, dispatchers and bus passengers trust and rely upon the information they receive. This is due to our pro-active daily management and focus on accurate data.

### **Maintenance Services**

We work with our clients to plan and build customised maintenance programs, and can help you to analyse, understand and meet your operational challenges. Our wide range of maintenance services includes the following:

- hardware maintenance for stops and buses
- on-bus unit repairs and services
- software maintenance and monitoring
- data preparation and importation
- database management (data verification and cleansing)
- report generation
- project management
- system upgrades

### **Management Services**

Our experienced team can also assist with the day-to-day running of your RTPi system. We can monitor your system and aid dispatch staff with on-site training and telephone support. This can facilitate improvements in system performance, productivity and quality assurance, and ensure consistent and reliable information for your passengers.

### **About Connexionz**

Founded in 1998, Connexionz Limited has evolved into a trusted provider of world-class bus tracking systems.

As a company, Connexionz has an established ability to analyse customer needs and make practical recommendations. Their dedicated team has a proven and dependable reputation for delivering projects successfully, on time and to budget.

Connexionz takes pride in its bus tracking products as they are efficient, user-friendly and affordable. With reliable software and hardware products of innovative design, Connexionz can help their customers to reduce costs, lower risk and grow patronage. In addition, their products are continually being developed to suit both the growth in user expectations and technological advances.
