I have been very satisfied with the project management and delivery provided by Connexionz to set up a SIRI data feed from the First bus 194 service into the Surrey County Council Trapeze RTPI system.

Connexionz staff were amenable throughout the project, providing a high level of customer service.

I was kept well informed during the project, and importantly not drawn into the technical detail conversations as they progressed.

Connexionz are technically very competent and have confidently found solutions to any issues as they arose. They worked very well together with Trapeze to successfully deliver this project in a timely manner and at an agreed price from the onset.

I would recommend Connexionz's for project work of this type.
